

July, 2012 - In Oct. 2012 I will be in remission for 4 years. It is a wonderful feeling. I am healthy and enjoying life with my wonderful family and friends. I continue to encourage others to get a biopsy rather than wait. I was told I didn't need a biopsy and to wait it out because it was only fibroadenoma. Luckily I listened to family and friends and have my lump biopsied.
